

HARVEY HEADBANGER and his great rival Hamish Highball are both very aggressive characters. They continually scrap just for the fun of it, and using their only weapons, a large belly and a strong head, they try to bounce each other as far away as they can!

HARVEY HEADBANGER is a one or two player game where you and a rival (or the computer) use your skill and dexterity to out manoeuvre each other in combat.

When you **BUMP** into your rival you will both be temporarily **BLACKED OUT**, and during this time you will suffer a severe headache and move erratically and in an **UNPREDICTABLE** direction!

Of course, at the start you will both suffer equally piercing migraines! However, you can effectively numb the pain, and so **RECOVER MORE QUICKLY**, by taking some suitably mind numbing refreshment which is made available during the course of the game!

Highly refreshing **COCKTAIL DRINKS** which contain the magic mind numbing ingredient will appear occasionally and you should **SLURP** these up, (straws provided) as noisily as you can!

So that you can see how well you are doing, you each have a large **SPIRAL STRAW** which fills with liquid to indicate your current level of '**REFRESHMENT**'!

The cocktails come in two basic colours. You can only drink those that belong to you (same colour), those that belong to your rival are **UNTOUCHABLE**. But, there is a way of drinking them without touching them!!

Now a **SECRET** is revealed! The highly refreshing cocktail drinks do **NOT** appear by chance! Instead they are created by performing a **SPECIAL MANOEUVRE** which it is up to you to discover. **HINT:** try going round in circles!

When you have discovered the technique try performing the same trick on your rival. If you are successful you will **WIN THE GAME!!**

FEATURES

Five **LEVELS** of difficulty are provided when playing against the computer. Level 1 is the easiest, and level 5 the hardest.

You may play **EITHER** side, and even **SWOP** during a game, you automatically take control of the side whose direction keys you press.

You may **CHANGE** the **DIRECTION KEYS** if you wish. Any keys (except DEL) may be used for player 1 but some key combinations may be disallowed for player 2. If you hear a 'beep' try a different key.

CONTROLS

The following controls operate while the game is running:-

DEL	ESC	Restart
DEL	TAB	Change Colours
DEL	CAPS	1 or 2 Players
DEL	SHIFT	Music On/Off
DEL	F1-F5	Engage Joystick
DEL	1-5	Level 1 to 5

Press the two keys simultaneously.
