

MUSIC MASTER

INSTRUCTIONS

1. To load press CTRL and small ENTER keys simultaneously, press play on datacorder then any key.

2. When the program runs follow the instructions written down the screen.

3. The first instruction appears after running the program is "Press DEL TAB together to load a piece from disc or tape, press any other key to continue".

If you have recorded a musical piece using this program before and you wish to replay it back then press DEL TAB keys together, otherwise press any other key and follow.

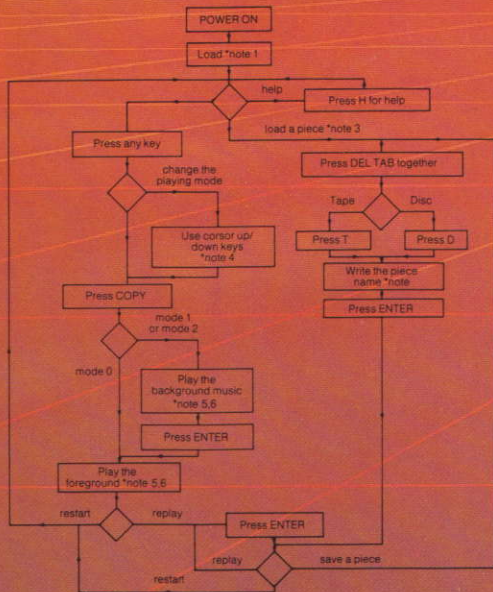

4. **CHOOSING THE PLAYING MODE:** Amstrad PC has three channels to play with. Music master gives you the facility to choose up to two channels to be as a background music, repeating automatically and then superimpose your foreground on it. This selection can be achieved using the cursor up and down keys.

5. You can select one of six different instruments for each channel and this can be achieved using keys 1-2-3 on the numeric keypad.

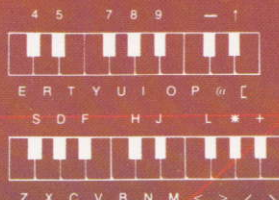

6. **KEYBOARD:** The figure shows the musical keyboard and the corresponding Amstrad keys, the musical key board shown consists of three octaves and this represents a window over an eight octave range, you can while playing shift this window in steps of an octave higher or lower using SHIFT and CAPSLOCK keys.

7. You can play percussion using keys 4-5-6-7-8-9 on the numeric keypad.

HINT: If you wish to play over a percussion background, select one channel for background and two channels for foreground, then play your percussion using the percussion keys, press the ENTER key as soon as you finish then the percussion will repeat automatically, and then you can play your foreground tune.
