ATV Simulator

Controls

To choose an option on the menu, press **SPACE** or move the joystick **DOWN** until it is highlighted, and then press **ENTER** or **FIRE**.

You must complete each course within the time limit (and without running out of fuel) to qualify for the next course. At the start of the race use the left/right controls to run to your ATV. Then jump onto it and start riding. Use the up/down controls to pop wheelies, and left/right to accelerate/brake. You can also turn around to get a run up for a jump. Use the jump control to get extra lift when you go up a ramp, and also to clear sharp or steep edges without crashing. To get up steep surfaces, wheelie slowly towards them and jump repeatedly to climb up.

If you crash and come off your ATV, press jump to get up, run back to your ATV, face in the right direction and jump onto it.
