

The **ANIMATOR**

AMSTRAD CPC 464/664/6128

WHEN YOU HAVE MADE THE
DISCOVERY
NOTHING ELSE COMES CLOSE

The ANIMATOR

AMSTRAD CPC 464/664/6128

The utility by which you can transform simple lines into animated sequences. Your opportunity to transfer the images in your mind to pictures on your screen. The Animator will provide not only hours of fun for everyone but also many opportunities for the serious minded programmer to develop his talents.

Features include:—

Drawing — An extensive set of commands are available for creating single frame pictures including the facilities of Box Draw, Polygon Draw and Curve Draw for image creation.

Colour — Simple operations that create colour shapes and change them with ease.

Transform — An exciting facility that allows you to create impressive animation sequences even if you have no gift for drawing. Transform your image by moving it, enlarging it, distorting shape... a whole variety of commands at your fingertips.

Run-Time Demo — The Animator contains a facility for running animation sequences without having to load the main program. These demos can also be incorporated into your own basic program, ideal for graphical presentation.

The power of your computer is enormous. The creativity within your mind is greater still. The Animator allows the two to come together to bring a whole new experience into your computing.
