**THREE
HUGE
COMBAT
ZONES!**

OVERHEAD ARCADE ACTION!

In **ARCADE FLIGHT SIMULATOR** you'll find yourself pitted against the cream of the airborne opposition thru three different combat scenarios. There's bi-planes over Germany in 1918, WW II fighters over Pearl Harbour in the 40's and Fast Jets over East Africa in the 90's. All require a different deployment of weapons technology and your dogfighting knowledge. You must win each battle by shooting down all the enemy planes. If you run out of ammo, land on a friendly runway and reload. Just like the real thing, the aircraft can dive, climb and bank. In the two player game you can choose your planes and war scenario. Destroy your opponent's aircraft in a frantic dogfight before he gets you!
