# ARCTICFOX

BY DYNAMIX

*Self-Tunell* *Richard Michels* *Kevin Ryan* *Damon Syge*

ELECTRONIC ARTS®

## HAVE TANK. WILL TRAVEL.

**THE ARCTICFOX** Deadly tank of the near future. You command its bone-crunching power on a rescue mission to the Arctic wastelands. The odds? Lousy. **THE REALITY CHECK** You get it all. A three-dimensional battlefield. Accurate simulation of tank movement. Gut-wrenching stereo sound effects. Arcticfox feels so real you'll want to park it in your garage.

TWO ON-SCREEN HANDS WORK ALL CONTROLS AND WEAPONRY

INCLUDING CANNON, GUIDED MISSILES AND MINES

These screen shots represent Amiga version. Other versions may differ.

MADE IN ENGLAND

*"So hot it practically melts  
the polar ice cap... A  
winner all the way."  
Family  
Computing*

## WHERE DO YOU SLEEP WHEN YOU OWN A 37-TON TANK? ANYWHERE YOU WANT TO.

From 0 to 100mph in seconds! Just imagine a 37-ton Corvette in a hurry.  
Your 150mm cannon cuts through steel plating like a hot blade through pudding. Go ahead... lose your restraint!

Two mine-dispensers in back. A not-so-subtle shock for enemies on your tail.  
Devastating line-of-sight guided missiles. Once launched, they can't be stopped. Don't get mad. Get even.

Have tank. Will travel. They say Antarctica is nice this time of year.

### THE ARCTICFOX (U.S.A.) PROTOTYPE

Weight: 37 tons  
Length: 9.3 m  
Width: 3.0 m  
Height: 2.0 m  
Engine: Slye-Hicks MX-100  
Reciprocating multi-fuel  
turbine, 100-600 h.p.  
Cryogenic cooling.  
Speed: 100 m.p.h.  
Crew: 1

Number: 1  
Armament: 150mm cannon  
2 mine dispensers  
Tunnel series missile-  
launcher.  
Line-of-sight missiles.  
Suspension: 2 forty-ton  
hydraulic lifts.  
Independent computer  
controlled.

"We build Worlds," is the motto of Dynamix, the designers of **Arcticfox**. Taking a break from world-building are (left to right) Kevin Ryan, Jeff Tunnell, Damon Slye and Richard Hicks.

They created the three-dimensional world of **Arcticfox** with a proprietary graphics package called 3-Space. It's responsible for the stunning projections and rotations in this program.

There is a Frisbee Golf course next to their office in Eugene, Oregon. It's responsible for keeping them sane during the fast-paced development of this program. "May the course be with you."

#### ABOUT OUR COMPANY:

We're an association of electronic artists who share a common goal. We want to fulfill the potential of personal computing. That's a tall order, but with enough imagination and enthusiasm, we think there's a good chance for success. Our products, like this one, are evidence of our intent. If you'd like a product brochure, send a stamped SAE to: Electronic Arts, 11/49 Station Road, Langley, Berks, SL3 8YN, England.
