BOB WINNER : A brilliant new game

Multiple fight mode... A new generation in graphics ... Digitised images... and lots and lots of music.

Beyond the realm of imagination is the wonderful world of the unknown that you have been yearning for ever since you can remember...

Countless obstacles and dangers hinder your progress, and you can hardly take a breath between fights ! Take the route that leads to the volcanoes and through the wild swamps where you will be attacked by giant wasps, and beware of the quicksand, and the landslides...

In the countries that lie on your way, vicious fighters try to prevent you from going any further and you have to fight them with feet, fists, in boxing rounds, or even shoot them if you're to pursue your quest.

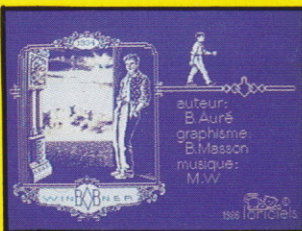

But brute force alone is not enough. You're on your own, against everyone and everything, and you'll need to deploy all you intelligence and wit if your want to discover just what it is you're searching for...
