THE DEEP™

**UNDER THE TRANQUIL SURFACE OF A
SUN BLEACHED SEA A SUBTERRANEAN
MENACE MASSES ITS FORCES!**

You never know what's lurking beneath the surface, laying in wait, ready to attack ... Any second now the underwater onslaught will begin taking you completely unawares. You'll need split second timing as you drop your depth charges – your only weapons – as you fight back destroying the enemy submarines armed with heat seeking torpedoes, floating mines and cruise missiles.

Screen shots from various formats.

On ne sait jamais ce qui se tapit sous la surface, aux aguêts, prêt à attaquer... D'une seconde à l'autre, l'assaut sous-marin va vous prendre au dépourvu. Vous aurez besoin d'être précis à la seconde près comme vous laissez tomber vos grenades sous-marines – vos seules armes – pour répondre aux attaques des sous-marins ennemis et détruire leurs torpilles thermiques, mines flottantes et missiles de croisière.

Man weiß nie, was sich unter der Oberfläche verbirgt, was auf einen wartet, bereit zum Angriff... Jeden Augenblick und ohne Vorwarnung kann das Abschlachten unter Wasser beginnen. Beim Kampf gegen die feindlichen U-Boote, ausgerüstet mit Torpedos mit Hitzesuchköpfen, Minen und Marschflugkörpern, braucht man ein Timing von Sekundenbruchteilen, um seine Tiefen-Sprengladungen fallenzulassen – übrigens Ihre einzige Waffe.

Non si sa mai quello che si nasconde sotto la superficie, in agguato, pronto all'attacco... Da un momento all'altro il devastante torrente sotterraneo eromperà su di voi, cogliendovi di sorpresa.

Soltanto grazie ai vostri rapidissimi riflessi, potrete contrattaccare con bombe di profondità – unica arma a vostra disposizione – e distruggere i sottomarini del nemico muniti di torpedo teleguidati verso fonti di calore, mine galleggianti e missili cruise.
