

AMSTRAD/SCHNEIDER

464 · 664 · 6128

HYPERBOWL

· MASTERTRONIC ·

In 3600 even ice hockey has gone hi-tech! It's played with linear motor ships, on a metal field complete with inertia cancellation devices homing missiles and fiendishly cunning computer opponents. Play a five-round Tournament for the right to Mastership or compete one-to-one in an all action two player game in this exciting future sport simulation. Ten different ship classes. Hyperbowl is simple to pick up, but impossible to put down!
