CASSETTE

Melbourne Draw

Now any Amstrad CPC computer owner from beginner to advanced can create detailed, colourful and realistic pictures for use in their own programs, with this versatile new Amstrad utility from Melbourne House based on the highly acclaimed GRAPHIQL package for the QL computer.

Special features of this powerful program include:

- * Magnification of the screen to allow detailed pixel by pixel design.
- * Facility to draw points, lines, circles, ellipses, boxes etc.
- * Full access to all 27 colours available on Amstrad computers.
- * Pull-down menus on screen allowing easy access to all commands.
- * Ability to reproduce pictures on a dot matrix printer.
- * Facilitates design in all 3 display modes, Hi-res, Medium-res, and Low-res.
- * Mirror effect for dramatic designs.
- * Air brush facility enabling user to create soft-effects.
- * Large range of texture facilities including ability to design own multi-coloured texture and fill specific parts of the screen with texture.

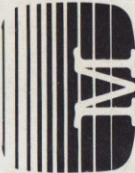

AMSTRAD MELBOURNE DRAW is accompanied by a comprehensive 36 page manual which explains to the user how to make maximum use of the superb graphics potential of the Amstrad CPC display chip.
