In this state of the art adventure with stunning, landscaped graphics, you have real-time multi-character control and there is full interaction between non-player characters via a sophisticated language parser.

For many generations the evil Orc legions – under the command of Kordomir the Necromancer – have struck south across the Great Waters in their monstrous dragonships to ravage the fair land of Belorn, carry off its ancient treasures and terrorise its peaceful people.

But now the time of an ancient prophecy has arrived – and you must act soon to ensure it is fulfilled.
