The cosmic character who helps you learn

ADI

Exploring Maths, English or French will never be the same again thanks to ADI, a loveable extraterrestrial who comes crashing into your computer.

He will entertain you with his funny remarks, whistly voice and constantly-changing facial expressions. He'll congratulate you when you do well, and cajole you when you make mistakes. He will always be on hand to help you with your problems, give you advice and reward you with games as you progress. And he'll act as your alien tutor as well as your computer-based friend.

ADI is so much fun to be with that he really makes learning a joy.

ADI is such a great help

ADI will offer you help as you work through his questions so you will always know exactly what to do. Each of ADI's packages contains 1,000 or more different questions, many with different variations. There is so much to do and so much to learn – and ADI will always be there to help you. As you work through the exercises you will gain in both confidence and ability.

He's helpful when you're in difficulty.

He goes to sleep if you leave him alone.

He gets excited whenever you do well.

He gets curious when you delay answering.

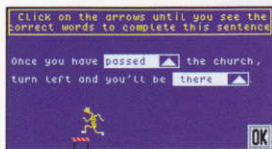

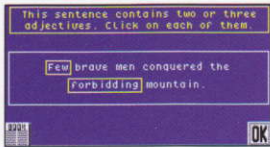

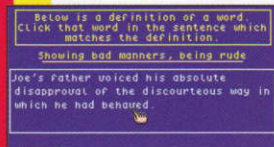

He becomes annoyed if you make too many silly mistakes.

He laughs when he tells you a joke.

ADI perfectly complements what you do in class. There is one package for each school year in a variety of subjects. ADI will reinforce your studies and test you in a new and exciting way and help you understand each area thoroughly.

Maths is so much easier with your own personal guide to help you with area, volume, angles, mental calculations, algebra, equations and statistics.

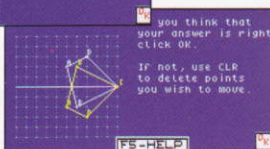

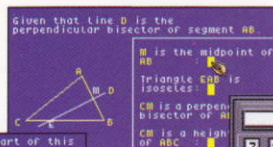

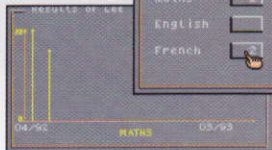

French really comes to life when it is presented in a fresh and exciting way – ideal for learning new words and grammar constructions.

(Release date: Autumn 1992)

And there are more subjects to come!!

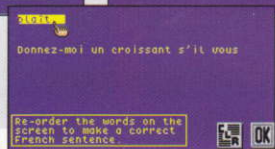

ADI reports on your progress

ADI monitors how you are doing by saving detailed statistics on disc. He produces report screens for you, your parents or your teacher – and he even draws a graph to chart your progress.

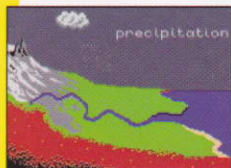

The calculator really comes in useful

ADI's English packages will help you to master your mother tongue by using exercises covering, for example, spelling, punctuation, synonyms, grammar and comprehension.

Information galore!

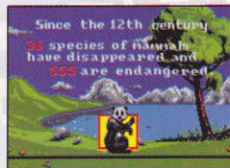

Each ADI package includes nine fascinating animated documents. These will show you information about:

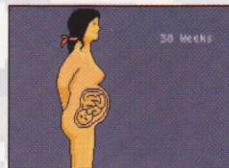

Cloud formation

The Solar System

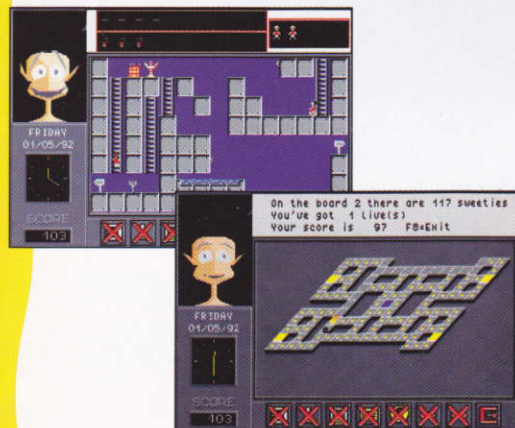

Endangered species

Pregnancy

...plus the evolution of man, human blood flow and many others that are just packed with useful information. Precise contents may vary between packages.

There is a map of Europe with up-to-date details on all the countries of the European Community including population, area, currency and economic statistics.

ADI not only helps you study, but he also provides you with the perfect way to relax after your studies as each package contains nine great games. When you first load a package, ADI will only let you play one of these – but as you work your way through his exercises and earn points, he will reward you with new games. Also included is a personal diary, a notebook and the ability to send a password-protected letter on disc.

It all helps to make ADI an indispensable companion for every computer-owning student.

ADI's educational value

ADI provides a new and unique approach to educational software. The ADI concept was developed after considering the results of extensive research by educationalists and psychologists into the way that children learn best. The content within each ADI package has been carefully written by teams of educationalists with the exacting requirements of the National Curriculum in mind. As a result, ADI is the perfect learning tool for senior students.

The ADI range

To ensure thorough coverage of each subject, there is one ADI package for each school year: Maths 11/12 is designed for the first year secondary, Maths 12/13 for the second year secondary, and so on.

Available **NOW:**

English 11/12 12/13 13/14 14/15

Maths 11/12 12/13 13/14 14/15

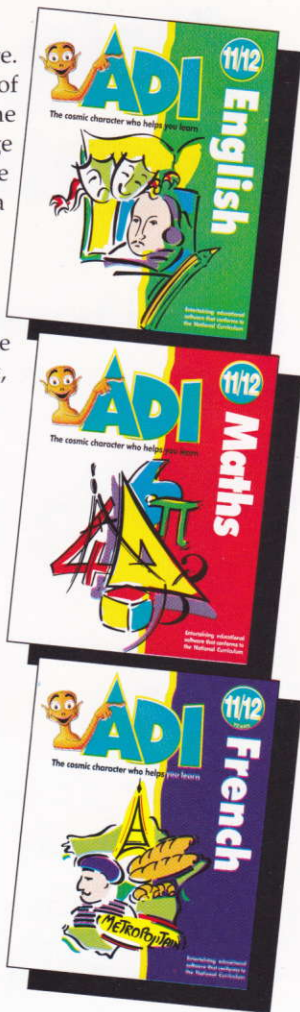

French 11/12 12/13 13/14 14/15

*For the
Amiga, PC
and Atari ST.*

Each pack contains:

- ADI environment
 - Subject and age-specific application (with 1,000+ carefully selected exercises)
 - Detailed help specific to the application
 - Nine documents
 - On-screen calculator
 - Personal diary
 - Notebook

Learn about the European Monetary system by converting different currencies.

SPY TRAVELS

Zoom around the globe in a variety of vehicles.

What Fun School owners say...

"The whole package is absolutely brilliant and will keep my daughter occupied for hours."

Sally Vosper, Burgess Hill

"Very impressive!... Excellent graphics, nice mixture of programs."

James Crowby, Wokingham

"First class. Easy to grasp instructions for the 5 to 7s. Excellent self-learning program for children."

Jill O'Hare, West Midlands

"Well worth the money. It helps our children to learn while they play - WELL DONE."

Sarah Farrell, Manchester
