

IF YOU ARE HAVING PROBLEMS LOADING YOUR DISK OR CASSETTE ...

... you may return it to the place of purchase or you may return it to Palace Software. Returning to Palace Software may help us isolate a problem or a bug more quickly.

If you return to us please do not send all the packaging. Return only the cassette or disk to:

Palace Software,
The Old Forge,
7 Caledonian Road,
London N1 9DX,
England.

Do not forget to include your name and address.

Please describe the problem you are having as clearly as possible. Let us know the computer number and model number. Describe any peripherals (disk drives, cartridges, etc.) that you may have attached to your computer. If you know the approximate age of the computer and version of the operating system this may help too.

IMPORTANT NOTE: Palace Software strives to ensure that its games are bug-free and operate on all versions of computers for which they are programmed at the time of publication.

However, computer manufacturers sometimes change the specifications of their machines which may cause problems on computers manufactured after the publication of this game.

In this event Palace Software will do all it can to help but cannot be finally held responsible and end-users must ultimately seek redress from the place of purchase.

ATARI ST 520 OWNERS ...

The Atari ST version of this game has been produced for use on double-sided disk drives only. Some older 520 STs contain single-sided disk drives and the game will appear to be faulty on these.

We have prepared another version for owners of 520 STs with single-sided disk drives, and this can be obtained free of charge directly from Palace Software by returning the disk ONLY.
